PLAY GIVES CHILDREN A CHANCE TO **PRACTICE** WHAT THEY ARE LEARNING

FRED ROGERS

Promoting
neurodiversity and
creating a safe
inclusive space to
grow.

FOR WHO

BASE: after school program

- Providing your child with productive play and healthy activities
- An afternoon child care program
- A space for social interaction

children ages: 3-18 years old.

This program is designed:

- To create a safe space for the children to have developmental required time and opportunities of play experiences.
- To develop the child's level of independence, curiosity, friendship building and love for learning
- To enhance the child's social skills and promote interactions with peers

PHILOSOPHY AND DESIGN

Breakthru Afternoon Services (B.A.S.E.) is created to provide an inclusive and secure after-school setting in which to play and socialize. It is an extended inclusive play-based service. It is designed to create a safe space for children to continue with their development through structured and unstructured play. We are aware there's a need for accessible and inclusive recreational opportunities for children with special needs. The program is design to provide space to build friendship, develop social skills and independence.

The program is open to children of all abilities (school going neurodivergents and special learning needs children).

1

GOAL SETTING

1st session starts with assessing the child's needs along with the parent's expectation of their child to define the long term and short term goals.

PARENTS CONSULTATION MEETING

Breakthru strongly advocates on parents' involvement in their child's progress. Through our monthly parent-facilitator consultation, we get to revisit previously set goals and assess the child's progress throughout the month. As well as set new long term and short term goals.

2

Progress Check

Throughout the period your child is with us, we will constantly communicate your child's progress via WhatsApp or Telegram communication whichever is preferred. Video and photos of the child will be sent.

3

Parent's Feedback

Parents are encouraged to send videos and photos of the child's challenges at home via WhatsApp / Telegram to their respective facilitator in charge. This ensures that both facilitator and parents have a common understanding of the child's behavior at home and at the center.

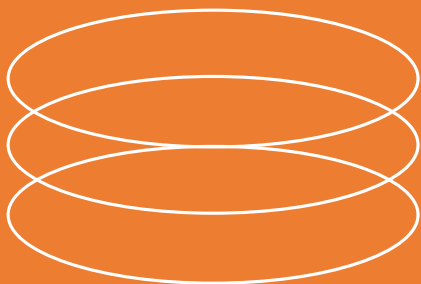

4

Revisit Goals

After a month, facilitators and parents will agree on a meeting date to assess the goal progress and marking it based on competency levels.

If the goal achieved is completed the parents are eligible to receive a **RM100** rebate.

New goals will be established and work in progress goals will be reassessed .
